NEW!
Now featuring Corinz™ All-in-One Oral Rinse

Continue Care™ Oral Cleansing and Suctioning Systems
Now with Corinz™ Oral Antiseptic and Moisturizer

THE ONE-STEP SOLUTION FOR AT-RISK PATIENTS

Corinz is an antiseptic cleansing and moisturizing oral rinse that contains cetylpyridinium chloride (CPC) 0.05% to reduce bacteria. It provides an oral care solution for patients who are able to perform self-care, and the all-in-one solution makes it easy for you to provide care to dependent patients.

Comprehensive oral care addresses bacterial colonization of the oral cavity, dental plaque and aspiration. Help protect your patients from pneumonia risk with Continue Care Oral Cleansing and Suctioning Systems.

ADDRESS RISK FACTORS WITH THE NV-HAP TOOLKIT

Visit www.sageproducts.com/NVHAPToolkit to access free assessment tools, educational materials, videos and more.

CLEANSES & MOISTURIZES
Brushing and suctioning with an antiseptic agent kills and mechanically removes bacterial biofilms (dental plaque) from teeth and oral tissues. Sweet-tasting solution helps retain moisture and improve compliance.

CONTINUE PREVENTION
OUTSIDE THE ICU

Non-ventilator hospital acquired pneumonia (NV-HAP) has the potential to affect more patients, be more costly, and be as lethal as ventilator-associated pneumonia (VAP). A published study demonstrated a 40% reduction of NV-HAP cases during a 12-month period, resulting in a return on investment of an estimated $1.6 million using a site specific oral care initiative.²

TOOTHETTE® SUCTION TOOTHBRUSH
Helps remove dental plaque,³,⁴ debris and oral secretions, all known to harbor potential respiratory pathogens.⁵,⁶,⁷,⁸

- Available with sodium bicarbonate to mechanically cleanse.
- Swab on back of brush helps deliver cleansing solution.
- User-friendly thumb port provides easy suction control.
- Three suction ports to avoid clogging. Keeps open path for debris.

TOOTHETTE® SUCTION SWAB
Helps remove debris and oral secretions while stimulating oral tissues³,⁹,¹⁰ between brushings.

- Available with sodium bicarbonate to mechanically cleanse.
- Soft foam heads gentle on delicate oral tissues.
- User-friendly thumb port provides easy suction control.
- Non-suction swabs available.

COVERED YANKAUER
Helps remove debris and secretions.

- Soft tip gentle on fragile oral tissues.
- User-friendly, one-piece design.

CORINZ™ ANTISEPTIC CLEANSING & MOISTURIZING ORAL RINSE

- Perpendicular ridges clean between teeth. Lifts debris and mucus from teeth and gums.
- Exclusive retractable sleeve addresses infection control issues by helping contain oral secretions and protecting Yankauer from environmental debris.
- Easy burst packet dispenses solution right in the package. Ready to use, no waste in product or nursing time due to mixing your own solutions.
