Protect all your patients from pneumonia

#OralCareForAll
Reduce risk factors associated with pneumonia—
for all your patients

Hospital-acquired pneumonia:
A diagnosis that impacts everyone

Your patients deserve to receive care without getting a hospital-acquired infection (HAI). Unfortunately, approximately 633,300 patients suffer infections every year.\(^1\) **Pneumonia is the most common type of infection and accounts for 25% of all HAIs.**\(^1\) It’s especially dangerous because it has a mortality rate of of 16% for all NV-HAP patients\(^2\) and can occur in every area of the hospital.

Most efforts to lower pneumonia rates have focused on ventilated patients…and those rates have gone down slightly. But all patients, including those who are not ventilated, are at risk within your hospital.

**What makes pneumonia so hard to prevent?**

**Risk factors in every unit**
Every hospitalized patient is at risk. Not just ventilated patients, or elderly or ICU patients. Your patients are at risk throughout their stay in the hospital.

**Understanding the importance of oral care**
Improving patient oral hygiene is something you can do easily — and it can significantly impact the risk factors for pneumonia.

~633,300 patients suffer with a healthcare-associated infection every year\(^1\)

25% of all HAIs are pneumonia\(^1\)

16% mortality rate for non-ventilator hospital-acquired pneumonia (NV-HAP)\(^2\)
Standardize your patient oral care program

Our oral care products can help you overcome the challenges of addressing pneumonia risk factors across the continuum of care. Our clinically proven products help you deliver proper patient oral care consistently, efficiently, and safely.

Here’s how we do it:

Comprehensive portfolio
We offer a wide range of products to help protect your patients throughout their hospital stay.

4 Unique product lines

58 Offerings

Designed efficiency
Easy-to-use, sequential packaging fits into your workflow and helps ensure compliance

Proven efficacy
Our products have demonstrated clinical value in 20+ peer-reviewed studies.
Sage oral care products: committed to quality

Our oral care products are designed, manufactured, and distributed from a state-of-the-art facility equipped with the latest quality control systems that meet healthcare industry and FDA standards. Our commitment to helping you improve patient outcomes is clear. These innovative features make our products the right choice for helping with improving patient outcomes.

**Q•Care® Rx with Corinz®**
The first-ever all-in-one suction toothbrush with antiseptic cleansing and moisturizing oral rinse for dependent patients.

**Sage Self Oral Care**
All-in-one, single use oral care system designed to address the risk factors associated with hospital-acquired pneumonia (HAP) for non-vent patients.

---

**A history of innovation and influence**

We helped establish the link between oral care and preventing ventilated-associated pneumonia (VAP) years ago. Now we’re leading the way to reduce the risk of pneumonia outside the ICU.

- **2001**: Sage develops the first comprehensive oral care kit, called “Complete Care.”
- **2002**: With the help of Bonnie Schleder, MS, RN, CCRN, a comprehensive oral care protocol is developed. Her study results are published in Journal of Advocate Healthcare.
- **2003**: Early study prototype leads to the development of sequential packaging that became Q•Care Systems.
- **2005**: CDC recognizes and cites Bonnie Schleder’s study in its “Guidelines for Preventing Healthcare-Associated Pneumonia.”
- **2006**: First 24-hour Q•Care Cleansing and Suctioning System with Suction Handle tools. New space-saving design and bedside bracket help improve compliance.
- **2007**: Sage Self Oral Care.
- **2008**: Q•Care Systems with user-friendly Thumb Port tools. One-piece design makes compliance even easier.
- **2009**: AACN adds comprehensive oral care to its procedure manual for critical care.
- **2010**: Q•Care Rx with Chlorhexidine Gluconate 0.12% Oral Rinse. The first and only comprehensive kit with single dose bottle oral CHG. Prescription drug requires documentation on the MAR, helping to increase compliance to oral care protocol.
Making an impact on patients’ lives

Helping you drive change at your facility

Our CustomerOne Value Analysis Program measures, analyzes, and reports

Changing practice involves lots of effort and above all else—data. You may know a change is needed, but you lack the evidence to gain acceptance. Evaluation is critical, but you may not have resources to gather, analyze, and report on your own. We can help. Our exclusive team of CustomerOne professionals is your expert resource for customized measurement and data analysis.

Let us help validate your success!
Your CustomerOne analyst has the expertise to generate reports customized to your needs. You’ll receive meaningful, actionable results that can be shared with decision-makers across your facility—all to drive change.
Let’s lower pneumonia rates—together

When patients enter a hospital, they shouldn’t have to worry about getting sicker. The risk of pneumonia is real—for all your patients. Reducing this threat takes a concentrated and coordinated effort. Our comprehensive portfolio addresses the risk factors of pneumonia across the continuum of care.

All hospital patients are at risk

Address the risk factors associated with pneumonia throughout the continuum of care:

- Pre-surgical
- Ventilated
- Non-ventilated
  - Dependent
  - Independent

Our commitment to you and your patients

We believe building partnerships can deliver better outcomes. Our goal is to provide the products, training, education, and support you need to provide the best possible care for your patients.

Available resources include:

- Ongoing product and process in-servicing and education
- FocusRN - a clinical education program that includes speaker programs, online learning, and accredited CE modules
- CustomerOne tracking and reporting
- Dedicated Medical Science Liaison to discuss evidence-based information with you and your team
