

Sage 2% Chlorhexidine Gluconate (CHG) Cloths

Clinically **proven**

Formulation

Contains a unique formulation hydrating ingredients

Other CHG cloths contain additional irritants such as alcohol and BZK

- **Alcohol** is known as a drying agent and has been known to cause irritation and induce dermatitis.¹
- **BZK** is a well known skin irritant:
A recent study found that 32% of patients had skin irritation when leaving 0.1% of BZK on their skin.²

pH
Adjuster

Emollient
Smooths skin

Aloe

Humectant
Hydrates skin

Ingredient	FDA active level ³	Ready Prep CHG ⁴
BZK	0.1-0.15%	0.16%

Efficacy

- **40% more** concentrated dose than other CHG cloths⁵
- **Effective against *Candida auris***,^{4,6}
- Our 2% CHG Cloth is **clinically validated** and meets strict FDA requirements.⁵

Outcomes

Proven effective in

22 outcomes specifically targeting the reduction of SSIs
